ALMA MATER STUDIORUM
UNIVERSITÀ DI BOLOGNA

Corso di Laurea in Ingegneria e Scienze Informatiche

DSL e Neverlang Language Workbench

Tesi di laurea in:
Programmazione ad Oggetti

Relatore
Prof. Viroli Mirko

Candidato
Terenzi Mirco

Correlatore
Prof. Aguzzi Gianluca

II Sessione di Laurea
Anno Accademico 2023-2024

Sommario

Max 2000 characters, strict.

Capitolo 1

Introduction

Write your intro here.

Terenzi Mirco: Add sidenotes in this way. They are named after the author of the thesis

You can use acronyms that your defined previously, such as Internet of Thing (IoT). If you use acronyms twice, they will be written in full only once (indeed, you can mention the IoT now without it being fully explained). In some cases, you may need a plural form of the acronym. For instance, that you are discussing Virtual Machines (VMs), you may need both VM and VMs.

Structure of the Thesis

Terenzi Mirco: At the end, describe the structure of the paper

Capitolo 2

State of the art

I suggest referencing stuff as follows: fig. 2.1 or Figura 2.1

2.1 Some cool topic

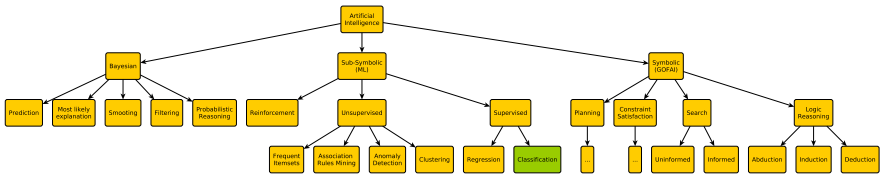

Figura 2.1: Some random image

Capitolo 3

Contribution

You may also put some code snippet (which is NOT float by default), eg: capitolo 3.

3.1 Fancy formulas here

```
public class HelloWorld {
  public static void main(String[] args) {
    // Prints "Hello, World" to the terminal window.
    System.out.println("Hello, World");
  }
}
```
